About Whiz

WhooshPro Content Management System (WPCMS) is here to help solve your day to day content management needs.

It is scalable, multi-tier, performance driven, highly customizable, and user friendly. It is an operation-oriented CMS platform for modern websites content management.

Our CMS has gone through iterations of improvements based on real technical and end user feedback. It has been built from ground up to address major concerns for user experience, speed and security.

There are many CMS out there in the market and we have frequently used and implemented a few good CMS. However every CMS has their strengths and weaknesses. The important fact is to choose a CMS that works in terms of your required features and budget; and very crucially the team that implements it – dedicated, professional and meticulous team who live and breathe CMS.

This is where our CMS makes a difference – it is one good flexible CMS and one that is the brainchild of WhooshPro – built in-house, based in Singapore. We know it inside out.

Tried and tested. WPCMS has been around for many years, and will be so for many years to come. It is our vision to create a CMS that works well in any sense, and one that stands out amongst the many good CMS around.

Of course, we support our CMS by providing you with comprehensive maintenance services and having you worry free about the technicalities of the CMS, while you focus on your content and core business.
